Construction of Plant No.3

Artist rendering of completed Plant No.3

RYOBI MHI Graphic Technology Ltd. (RMGT, President: Katsushi Hirokawa) will construct a Plant No.3 on its Head Office Factory premises. The new plant will be a single-story building with a floor area of 4,398.98 m², and is scheduled for completion in October 2023.

RMGT was established in 2014 through the merger of the sheet-fed offset printing press operations of Ryobi Ltd. and Mitsubishi Heavy Industries Printing & Packaging Machinery, Ltd. With a corporate message of “Coloring the World Together,” RMGT offers a full lineup of high-quality, high value-added offset presses in a wide range of sizes. As a highly respected global brand, RMGT presses are used in more than 170 countries and regions worldwide.

The newly constructed Plant No.3 is scheduled to be fitted with large cranes and other equipment for the assembly of mainly large size sheet-fed offset presses.

With the construction of the Plant No.3 adjacent to the Plant No.1 and Plant No.2, RMGT’s previously dispersed manufacturing operations will be concentrated in one location, optimizing the production system and increasing productivity.

Outline of RYOBI MHI Graphic Technology Ltd.’s Plant No.3

Location	800-2 Ukai-cho, Fuchu-shi, Hiroshima-ken (on Head Office Factory premises)
