

IRODORI — Coloring the World Together

RMGT 10

1,050 mm format offset press
Wide stock range press

The RMGT 10 features a maximum paper width of 1,050 mm. A smooth sheet transfer system employing air management technology enables it to handle a wide range of stock thicknesses from 0.04 mm thin paper to 1.0 mm heavy packaging. The press also features a newly developed automatic non-stop feeder and a delivery shutter. Demonstrations will highlight non-stop package printing on heavy stock.

RMGT 9

A1-size offset press
Convertible perfecter

Combining the highly reliable paper transport of RMGT's 1,050 mm format presses with software enabling easy maintenance, the RMGT 9 offers even higher productivity. Job changeover is much faster thanks to the Smart-FPC fully automatic simultaneous plate changing system. Demonstrations will feature one-pass instant-curing perfecting employing the press's two LED-UV curing systems, one over the perfecting device and the other at the delivery section.
